ESD PROTECTED AREA (EPA)

ESD protected area (sample configuration)

- ① Marking of an Electrostatic Protected Area (EPA)
- ② Personnel Grounding Tester for testing „wrist strap grounding system“ and “Person footwear system”
- ③ Conductive or dissipative flooring system for Personnel Grounding over “Person footwear system”, grounding of ESD chairs, ESD transport carts etc.
- ④ ESD shoes, heel grounder or toe grounder for „Personnel Grounding“
- ⑤ Wrist strap system for grounding of Personnel in seating position
- ⑥ ESD garments are shielding the electrostatic fields of the normal clothing
- ⑦ ESD chairs minimize the chargeability of Personnel when getting up and additionally ground a person when sitting down
- ⑧ ESD Workstation with dissipative bench top and dissipative shelves
- ⑨ Galvanized steel shelving system will secure, when grounded properly, the dissipation of charges from conductive or dissipative transport systems and packaging
- ⑩ Utility Cart with 4 conductive castors
- ⑪ ESD packaging (conductive, dissipative and/or ESD shielding) is needed for a proper transport of electronic components and boards within and outside an EPA.
- ⑫ Storage racks are used to store ESDs (Electrostatic Sensitive Devices)
- ⑬ Ionisers can neutralise electrostatic charges on process relevant isolators
- ⑭ ESD safe office equipment like ring binders and lighting magnifiers prevent the danger of electrostatic fields at workstations
- ⑮ Test and measurement equipment is needed for verification of all the different ESD items within an EPA

Information video

Company Wolfgang Warmbier is located in the south of Germany near the Swiss border. The privately owned company has been producing and distributing ESD control products on its 23.000 sqm facility since 1982.

An annex to the existing building, built between May 2012 and August 2013, created additional 4700 square meters of office and warehouse space. The storage capacity currently amounts to over 6500 pallet spaces. Furthermore, the new building includes an additional ESD laboratory with a walk-in climate chamber and a training center for 50 people.

Besides production and distribution, our activities include EPA consulting and planning, ESD training and workshops, ESD audits, and material analyses according to the current ESD standards.

Warmbier also specializes in tailoring products to meet the customers ever growing demands for non standard products. Over the last few years we invested in new machinery to optimize and expand production. As well as packaging we also cut table and floor mats to order.

QUALITY CONTROL SYSTEM

Since 1998 Company Wolfgang Warmbier maintains a Quality Control System certified by the DQS GmbH.

UVEX I-PURENRJ TECHNOLOGY - OUTSOLE

The future is full of energy with the pioneering uvex 1 G2. The innovative new uvex polyurethane sole technology—uvex PUREnrj—returns the landing energy over the entire sole unit back to the wearer. It redefines shock absorption and stability, with noticeably greater comfort and significantly less fatigue in the feet throughout a working day that is brimming with energy – from beginning to end.

**More Stability.
Reduced Risk of Injuries.
More Safety.**

**66% Energy return
underneath the heel**

**59% Energy return
in the forefoot area**

**29% higher cushioning
after 1000 km use**

UVEX COMFORTABLE CLIMATIC INSOLE

uvex comfortable climatic insoles provide the foot with full-surface shock absorption and ensures comfort in high-strain zones.

Features of the comfortable climatic insole are:

- Ultra breathable and moisture-absorbing materials
- Shock absorption zones support natural foot movement
- Non-irritating, comfortable upper

SAFETY SHOES

STEITZ SECURA

SICHERHEITSSCHUHE

VARIO REBOUND-TECHNOLOGY

Optimal damping in the heel area and effective return of energy in the forefoot – for you, this means: maximum comfort plus stability. The special shoe construction reduces lever arms. This provides your foot with maximum stability in the shoe and tangible relief.

- High energy return rate leads to reduced effort in every step
- Excellent weight-adapted damping properties
- Wear-free sole technology and long-lasting quality
- Reduced weight due to low material density
- Free from material fatigue and therefore longer lifetime
- Unchanged comfort properties down to -25°C
- Free from solvents and silicone, therefore suitable for allerav sufferers

REBOUND EFFECT

ABSORPTION

VARIO MULTIFLEX®

Once you put on your shoes, the natural movement of your feet changes. Research has also found that the less the shoe impacts the natural movement of the foot, the lower the incidence of foot disorders. Lever arms in particular may cause diverse movement disorders. Lever arms of the shoe force the foot to make unnatural movements and can lead to foot and Achilles tendon complaints, knee pain and back problems. Furthermore, lever arm forces can increase the risk of injuries such as sprained ankles.

SECURA VARIO® SYSTEM

Back protection through individual heel cushioning

up to 57 kg up to 79 kg up to 91 kg up to 105 kg above 105 kg

The replaceable, weight and pressure dependent heel shock absorption system ensures cushioning adapted to the individual needs of the wearer. The pressure load in the shoe is reduced to a natural level, the back is relieved in a targeted manner and fatigue is significantly decreased.

THE BENEFITS:

- Flexible and robust rubber lacing
- Individually adjustable
- Always constant lacing intensity
- Simplifies and speeds up putting on and taking off
- Reduces the risk of a potential trip hazard
- Excellent for working on rotating machines

OUTSOLES

TPU ATHLETIC ESD

- 3,5 mm profile
- Supports natural movement
- Lightweight and flexible
- Excellent abrasion resistance and slip resistance
- Heat-resistant up to approx. 120° C

TPU COMPETITION

- 3 mm profile
- Lightweight and flexible
- Excellent abrasion resistance and slip resistance
- Heat-resistant up to approx. 120° C

STEITZ FLEXO

FLEXIBLE – INDIVIDUAL – SAFE

STEITZ FLEXO SYSTEM

Some of the new STEITZ models are equipped with the new FLEXO lock system. Once adjusted, the individual fit of your safety shoe is permanent, without time-consuming lacing. This also prevents tripping hazards from open shoelaces. An optimal combination of comfort and protection.

Do you prefer the conventional lacing? No problem. Classic shoelaces are included with every shoe.

ELTEN

OUTSOLE

TPU/PU MAXXIMO

MAXXIMUM EFEKTIVITY

With every step, Infinergy® absorbs a lot of energy.

MAXXIMUM SENSE OF WELL-BEING

The wearer's feet stay fit longer with Infinergy®.

MAXXIMUM DURABILITY

Infinergy® remains permanently elastic and always returns to its original form.

MAXXIMUM BOUNCE

Infinergy® returns far more energy to the wearer than traditional materials.

MAXXIMUM JOINT REST

Due to the excellent damping effects of Infinergy®, the joints are permanently protected.

MAXXIMUM TEMPERATURE RESISTANCE

Infinergy® retains full functionality in climatic conditions between -20 and + 80° Celsius.

Maxximo

MONO-PU SOLE L10

- Dissipative
- Optimal slip resistance

Outsole:

TPU = (thermoplastic polyurethane)

- Particularly abrasion-resistant
- Heat-resistant to approx. 130°C, flexible at cold temperatures to approx. -30°C
- Oil and fuel resistant

Midsole: PU

- The soft PU core provides a good impact absorption and high wearing comfort

L10

TRANSFOAMERS

Special foaming in the midsole. Made of two layers: EVA and TPU. TPU has a low weight combined with a very high resistance to bending and tearing. The lightweight EVA plastic, which is commonly used in the midsoles of many running shoes, has special cushioning properties.
